

This message is in regard to satellite radio. I enjoy listening to XM Satellite Radio and believe its traffic and weather channels are a great service. The variety and quality of the stations on satellite radio are not available elsewhere. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. Satellite radio is to radio what cable is to television. I am asking the FCC to reject the NAB's petition 04-160 and I support XM's ability to provide the kind of programming that I can enjoy and only hear on satellite radio.
